1<sup>st</sup> – 3<sup>rd</sup> Grades

*Learn*

# Animation & Scratch Coding

## Computer 102 – PowerPoint and Scratch Coding

- Animation and Multimedia Presentations
- Scratch Coding – Basics

This **11-weeks** foundation series program will focus on more features in PowerPoint and will also teach them to create animated stories in PowerPoint. They will also be learning basic scratch coding (make simple games and animation) during the second half where they will understand very simple programming logics and concepts using block (no typing required) This will build a good foundation for next level of coding class and will ease them to take up the technology challenges and projects for higher grades by making them more tech savvy.

All learning is based on hands on exercise and fun projects in no stress environment. Along with this they will also get lot of opportunity to get proficient in basic skill like file management and organizing their work, good file naming and will develop other good computer habits which will give them a good foundation to build on. These will help them to gain the speed and accuracy.

Discovery Elementary
